HOBBIES

Music, composing and arranging songs, digital illustration, video games, learning, Apple toys, wine, going to the movies, eating cheese, playing with my kids, and learning new technologies!

PROFILE

Dynamic Full-Stack Developer with over **11 years of experience** delivering innovative, high-performance **web and mobile applications** . Skilled in **JavaScript** , **TypeScript** , and **Python** , with hands-on expertise in building **scalable solutions** using **AWS** and **GCP** .

Recognized for **technical leadership** , **team mentorship** , and a strong ability to drive projects from concept to deployment. Proven success in developing modern front-end experiences with **Angular** and **React** , and architecting robust **API** and **microservices** integrations.

Thrives in **multicultural, fast-paced environments** , adapting quickly to shifting priorities. Passionate about leveraging technology to build impactful products and promote cross-functional collaboration.

EMPLOYMENT HISTORY

Technical Consultant– Perficient, Chile
2025

As a Technical Consultant at Caterpillar, I'm responsible for developing new modules and components for the company's e-commerce platform. My work involves using technologies such as **React**, **HTML**, **CSS**, **WCAG**, **Bootstrap 5**, **Azure**, **Windows Cloud**, and **HCL Management Center**, **Scrum**.

Senior Mobile Developer – Insight Global, USA
2025

As a mobile developer, I am responsible for **building new modules** and **optimizing** existing features of the **Holland America** mobile application. I also play an active role in migrating legacy code from **Cordova** to **Capacitor**. To achieve this, I work with technologies such as **React**, **Ionic**, **Capacitor**, **Cordova**, **Android Studio**, **Xcode**, **Jenkins**, **Jira**, **Confluence**, among others.

Tech Lead Full Stack and Mobile Developer - Otapp, Santiago
2024 - 2025

As an Tech LeadI am responsible for **requirements gathering** , **solution design** , and **management of server architecture** on **AWS** , **MySQL database configuration** , **backend development** with **Node - Express** , **Python - Flask, Go - Gin, frontend development** with **Angular and React** , **mobile development** with **Ionic and React Native** , and **leading development teams** .

I oversee the **continuous monitoring** of platform performance and actively **propose and implement improvements** to support the ongoing evolution of the business. I am also responsible for **collaborating with stakeholders** to evaluate and recommend the best technical solutions aligned with business goals and market dynamics.

For UI development, I use component libraries and styling frameworks such as **Angular Material** and **Tailwind CSS** to deliver clean, responsive, and accessible interfaces across web and mobile platforms.

Experienced in **AWS infrastructure administration** using services such as **EC2** , **S3** , **SES** , **Route 53** , **CloudFront** , and **RDS** .

Responsible for **maintaining and publishing mobile applications** on the **App Store** and **Google Play** , managing the entire **build** , **signing** , **upload** , and **review process** for both platforms. Additionally, I have built workflow automations with n8n, integrating OpenAI and Google services to optimize internal processes, streamline operations, and reduce manual workloads.

This project has also been **awarded funding from CORFO** , the Chilean government agency for innovation, and is currently **scaling and undergoing validation** as part of its funding process.

Sr Angular Front End Developer at Perficient, Santiago
2022 — 2024

As a **Senior Angular Developer** , I worked with international clients such as **XPO** , the **Government of Uruguay** , and **U.S.-based startups** . I developed and maintained applications using **Angular 13+** and **Angular 17+** , integrating **REST APIs** and **IoT solutions** . For internal projects, I implemented **OpenAI** integrations using **Angular 17+** and **FastAPI, Langchain** and **pinecone** . My responsibilities included building **reusable components** , **refactoring legacy code** , and improving **application performance** . I collaborated closely with **multicultural** , **English-speaking teams** in **fast-paced** and **technically demanding environments** .

Additionally, I was responsible for setting up and managing **development environments** using **Spring Boot** and **C# .NET** , and working with various **databases** such as **MySQL** , **Microsoft SQL Server** , and **MongoDB** . running on **AWS**, **GCP** and **AZURE** architecture.

Sr Front End Developer at Overactive, Santiago
2022 — 2024

Developed a **REST API** integrated with **ChatGPT** using **Python**, **FastAPI**, and **Angular**. Improved and optimized web applications using **Angular 13+**, focusing on performance, maintainability, and user experience. Worked with clean code practices, conducted code reviews, and contributed to both server-side and client-side development. Applied strong analytical thinking and attention to detail to meet product and technical requirements within Agile environments. Communicated daily in **English with international clients**, demonstrating responsiveness, verbal communication skills, and adaptability to fast-paced, dynamic settings. Contributed to full project lifecycles, from software design and deployment to test coverage and continuous integration. Experience includes **Node.js**, **React.js**, **React Native**, **RxJS**, **AngularJS**, **MariaDB**, and **API** development, with a strong foundation in **SOLID** principles, the software development life cycle (SDLC), and quality assurance for **SaaS** platforms and **IoT** solutions.

Full Stack Developer, Technical Lead at Clever IT, Santiago
2021 — 2022

Led the development of web modules using **Angular 13+** and maintained **CI/CD pipelines** to support **continuous delivery** .

Designed and **integrated RESTful** and **SOAP web services** within a **microservices architecture** using **NestJS** , leveraging a **Backend for Frontend (BFF)** pattern to optimize client-specific data flows and performance.

The platform was built on **Google Cloud Platform (GCP)** , utilizing **Kubernetes** for **container orchestration** and **Microsoft SQL Server (MSSQL)** as the primary database.

Successfully **delivered a proof of concept (PoC)** that enabled the deployment of the web application as a **mobile app** using **Capacitor** .

Collaborated with **U.S.-based clients** and **cross-functional teams** to deliver **high-quality** , **maintainable** , and **efficient software solutions** . Experience using **Contentful** and **ButterCMS** for public content management and feature flag handling.

Full Stack Developer at Practia, Santiago
2020 — 2021

Developed backend **microservices** using **Node.js** and **Express** , deployed in **Docker containers** within a **microservices architecture** .

Collaborated directly with the client, **Banco Falabella Perú** , to gather and define **requirements** , applying the **Backend for Frontend (BFF)** pattern to tailor **APIs** to **frontend** needs.

Monitored application **performance** and **logs** using **Grafana** , ensuring **high availability** and **reliability** .

Optimized backend services for **scalability** and **performance** , working in **Agile/Scrum environments** with **cross-functional teams** . Experience using **Contentful** and **ButterCMS** for public content management and feature flag handling.

Front End Developer at Trebol IT, Santiago
April 2019 — March 2020

Developed **microservices** using **Spring Boot**, **JPA**, **Hibernate** and **Java** for Banco de Chile. Maintained legacy code written in **AngularJS** and migrated several modules to

Angular 2+. Integrated **RESTful APIs** and connected with the core banking system. Also participated in the production support team, troubleshooting platform issues and ensuring service continuity using **CI/CD** pipelines. Worked within **Agile methodologies**, collaborating closely with cross-functional teams to deliver iterative improvements.

Full Stack Developer at Acepta, Santiago
2015 — 2019

Led the development of **Notarisa.cl** , from initial concept to product launch. **Designed** the database architecture, **built RESTful APIs using Python** , and **developed** the web platform with **Angular** . Coordinated integration efforts with an external team responsible for the mobile application. The platform later became an independent company.

Contributed to the **ICAR project** , developing backend services with **PHP** and **PostgreSQL** , with a strong focus on **stored procedures** and **query optimization** for high-performance data processing. Maintained a custom **web scraping robot** built with **Bottle (Python)** , responsible for automatically downloading official documents associated with vehicles listed for sale. Participated in on-site deployment, visiting clients to install **biometric devices** such as **fingerprint scanners** and **advanced electronic signature hardware** .

Proposed and implemented platform improvements , including the integration of **Node.js** and **WebSockets** to enable **real-time dashboards** and event-driven components.

Provided maintenance and ensured **operational continuity** for the **SENCE platform** , developed with **CakePHP** and used for government-related digital services.

Led a development team in **database design** and **API creation** , launching long-lasting products. **Managed microservices** with **Node.js** and **NestJS** on **GCP** , using **Nginx as an API Gateway** to coordinate communication between microservices. **Actively participated** in client meetings to define technical requirements and align on project goals.

Handled the setup and administration of **Linux EC2 instances on AWS** , configuring **development and production environments** using **SSH** and **FTP** . Managed **MySQL** and **PostgreSQL** databases and deployed web servers using **Apache** and **Nginx** .

Front End Developer at NetQuest, Santiago
2015

Developed web surveys and applications, optimizing for **cross-platform performance** and **accessibility** .

Proposed and implemented dynamic plugins to enhance the **user experience** in survey interactions.

Integrated styling libraries such as **Bootstrap** and custom **CSS** to improve UI consistency and usability.

The development was based on **vanilla JavaScript** , which required a strong emphasis on **clean code** , **best practices** , and **modular architecture** to ensure the solution was **reusable** , **scalable** , and **easy to maintain** .

Shared knowledge and mentored junior developers , promoting collaboration and technical growth within the team.

Full Stack & Mobile Developer at Chorrillana Studio, Santiago
2014 — 2015

Managed multiple projects and adapted quickly to various **frameworks** and **technological contexts** .

Conducted research and evaluation of the most appropriate technologies for new projects to ensure scalability, maintainability, and performance.

Built hybrid mobile applications using **PhoneGap** , starting completely from scratch due to the absence of UI templates.

Programmed **custom navigation, animations, and transitions** based on the designs provided by the UI/UX team, ensuring that mobile apps were as **efficient and lightweight as possible** to closely emulate **native behavior** .

Worked with a wide range of technologies including **PHP** , **Java** , **JavaScript** , **C#** , **Symfony** , **Laravel** and internal tools to deliver everything from **landing pages** to **fully featured SaaS platforms** , using **monolithic architectures** and the **MVC design pattern** .

Developed cross-platform mobile applications using **PhoneGap** and **Ionic** , integrating **backend services in PHP** .

Published mobile applications on both the **App Store** and **Google Play** , managing the **build** , **code signing** , **upload** , and **review process** for each platform.

Managed and maintained **Linux EC2 instances on AWS** , setting up **development and production environments** using **SSH** and **FTP protocols** .

Configured and administered **MySQL** and **PostgreSQL** databases, and deployed **Apache** and **Nginx** web servers as part of full-stack deployments.

Front End Developer at JMSoftware S.A, Santiago
2013 — 2014

Developed front-end modules with **AngularJS** ,**Java , PHP, SQLServer**, enhancing performanceand integrating **APIs**.

FREELANCE HISTORY

Radical Agro – Full Stack Developer (Freelance), Santiago
2025

I developed an application to monitor the growth of agricultural plantations. The monitoring process leveraged **Google Earth Engine** to retrieve satellite images and data, enabling the observation of a drawn polygon's area (via **Maps**) at a maximum frequency of every five days. Using the retrieved data and **OpenAI**, the system generated detailed reports on the condition of the monitored land and produced **PDF** reports from **HTML** templates. The web platform was built with **Flask**, **MySQL**, **MongoDB**, **AWS**, and **React**.

Wheelwork – Tech Lead (Freelance), Santiago
2025

Designed and implemented automated web scraping processes using **Python Playwright, CrewIA** and **n8n** to collect data from multiple sources. Additionally, I developed i**ntelligent agents** and to analyze and **classify documents**, videos, and LinkedIn profiles. These solutions significantly enhanced the company's internal operational efficiency.

I also developed a résumé enhancement tool for **ATS scans**, leveraging **OpenAI**, **RAG**, and **LangChain** and **pinecone** to improve wording, optimize keywords, and generate **PDF** documents from **HTML**.

Valora Más – Fullstack Developer (Freelance), Santiago
2025
As a web developer, I was responsible for maintaining, backing up, optimizing, and evolving the corporate website built with WordPress and Elementor.

Amayhogar – Fullstack Developer (Freelance), Santiago
2025

As a full-stack developer, I led the development of an online store using the Jumpseller platform, integrating Blue Express for logistics and Getnet as the payment gateway.

PainPal - Fullstack (in progress) at Freelance, Santiago
2024

As a **Full-Stack Developer**, I was responsible for gathering requirements and recommending the most appropriate technologies for the **MVP** of this Chilean **startup**, ensuring the solution was technically sound and aligned with a limited early-stage budget. The project is supported by **CORFO**, a Chilean government program that funds innovation and entrepreneurship.

To deliver a high-performance and maintainable backend, the **REST API** was built using **Go with the Gin framework**, chosen for its efficiency, simplicity, and fast execution. Gin provided a clean and modular structure that allowed rapid development and smooth integration with other **AWS** services.

The API was designed to be scalable and maintainable, supporting future growth and planned integration with a **mobile client**. The frontend was developed in **React**, while **Tailwind CSS** was used to create a clean and **responsive UI**.

The entire system is deployed on **AWS**, leveraging its infrastructure to ensure availability, performance, and flexibility without exceeding the project's budget.

The project is currently ongoing and in the validation phase with **CORFO**.

Health It - Fullstack and Mobile Developer (in progress) at Freelance, Santiago
2025

As a **Full-Stack and Mobile Developer** , I worked with the Chilean startup **Health It** , gathering business requirements to help shape their upcoming **SaaS** and **mobile platform** , soon to be launched in the Chilean market.

I designed a scalable and modern **server architecture** based on **AWS** , leveraging services such as **EC2** , **S3** , **CloudFront** , and **RDS** with **MySQL** , as well as **MongoDB** for flexible data handling.

The platform was built using **React**, **Flutter**, and **Go** (Gin framework) on the backend, with **Tailwind CSS** ensuring a consistent and **responsive UI**. The solution was carefully designed and implemented to support the future evolution of the business in terms of performance, scalability, and maintainability. Additionally, the system integrates with **OpenAI** to enhance functionality through AI-driven features.

Hiit - Fullstack at Freelance, Santiago
2025

I developed a web application using **React** and **Tailwind CSS** to monitor interval-based exercises, as a contribution to the team of physical therapists at the recovery center where I receive treatment. The platform, available for free at https://hiit.propulsa.cl, was built with scalability and maintainability in mind. Mobile versions are currently being developed using **Flutter** and will soon be available for both **Android** and **iOS**.

Handly - Fullstack and Mobile Developer (in progress) at Freelance, Santiago
2024

As a **Full-Stack and Mobile Developer** , I worked with the Chilean startup **Handly** , gathering business requirements to help shape their upcoming **SaaS** and **mobile platform** , soon to be launched in the Chilean market.

I designed a scalable and modern **server architecture** based on **AWS** , leveraging services such as **EC2** , **S3** , **CloudFront** , and **RDS** with **MySQL** , as well as **MongoDB** for flexible data handling.

The platform was built using **React** , **React Native** , **Go** , and **Gin** on the backend, along with **Tailwind CSS** for consistent, responsive UI design. The solution was planned and implemented to support the future evolution of the business in terms of performance, scalability, and maintainability.

Tickets- Fullstack Developer at Freelance, Santiago
2024

As a contribution to a charitable cause, I designed and developed a **ticket sales and validation system** for a benefit event. The platform allowed users to generate tickets with **QR codes** , which could be validated through a **web application** using a smartphone camera.

The solution was built using **React** , **Tailwind CSS** , and **SlimPHP** , deployed on a **shared hosting environment with cPanel** and a **MySQL** database.

This project was developed **entirely on a pro bono basis** , with no charges for my services, as a personal commitment to support the event and its mission.

Although the application was designed specifically for a one-time event and decommissioned after a few months, it significantly **optimized and simplified the ticket sales and validation process** , contributing to the success of the initiative.

MemeApp - Fullstack Developer at Freelance, Santiago
2023

Developed full-stack web applications using **Slim PHP** (for the API) and **Angular 13 / React** (for the frontend), deployed on **AWS infrastructure** including **EC2** , **S3** , and **CloudFront** .

As a consultant for the **Universidad de Ciencias de la Educación** in Chile, I was responsible for designing and developing a **pedagogical tool from scratch** that allows users to create memes based on the university's **Pinacoteca of Chilean graphic artworks** .

This required gathering requirements from a **non-technical team** and translating their needs into a functional, user-friendly solution.

The platform was developed using **Angular** , **React** , and **Canvas API** , with a **Slim PHP** REST API backend. It was deployed on **AWS services** (EC2, S3, CloudFront) and included a **cPanel layer** to simplify platform administration.

Additionally, I have continued to support and contribute to the **evolution of the application** , proposing and implementing enhancements and new modules as the tool has grown and user needs have changed.

LineGps - Fullstack and Mobile Developer at Freelance, Santiago
2023

As an external consultant, I am responsible for managing **AWS EC2 instances** and maintaining the services used for **file uploads** consumed by the mobile application. I am also in charge of **maintaining and updating the iOS version** of the app.

Additionally, I serve as the **technical architect** for services built in **Node.js** and **PHP** , running on **AWS-based infrastructure** , where I lead the design and evolution of backend solutions.

I provide **ongoing support** and ensure the **stability and continuity** of the AWS server architecture.

I advise the development team whenever they face **challenges beyond their area of expertise** , and I am responsible for **resolving production issues** quickly and effectively to minimize downtime and ensure platform availability.

I actively **propose improvements** and **implement solutions** to optimize performance and support business growth in line with evolving technical requirements.

Abaneros - Fullstack and Mobile Developer at Freelance, Santiago
2023

As an external consultant, I am responsible for **managing AWS EC2 instances** and maintaining the services used for **file uploads** consumed by the mobile application. I am also in charge of **maintaining and updating the iOS version** of the app.

The platform relies on **AWS services** such as **EC2** and **S3** , and I developed a custom **PHP API** to handle document uploads, which I continue to **support and maintain** as part of the core system infrastructure.

I also provide **consulting, analysis, and development services** to assist with **critical production issues** that cannot be resolved by the internal team, ensuring the **continuity and stability** of the platform in high-impact scenarios.

4Roomis - Fullstack and Mobile Developer at Freelance, Santiago
2022 — 2024

As a **Full-Stack and Mobile Developer** , I was responsible for designing and modeling the technical solution for the Chilean startup **4Roomis** , evaluating and proposing the best technological approach to meet business goals within a limited budget. The project was developed with funding from **CORFO** , a public innovation fund provided by the Government of Chile to support new businesses.

For the MVP, the platform was developed as a **web application** using **Angular** , **SlimPHP** , and **MySQL** , deployed on a **shared hosting environment** to reduce initial infrastructure costs.

In the second phase, a **mobile application** was developed using **React Native** (for both **iOS** and **Android**), alongside improvements to the UI using **Tailwind CSS** and enhancements to the **REST API** to support **payment integration with Flow.cl** , a local payment provider.

I also handled the **submission and publishing process** for both mobile applications on the **App Store** and **Google Play** , as well as **administered testing efforts** to ensure quality and stability.

Red Dragon App - Mobile Developer at Freelance, brazil
2019 — 2019

As an **Android mobile developer** , I built a **custom mobile application** using **Kotlin** to integrate with portable **laser printers** for **lottery ticket generation and printing** . The solution required integrating native **printer drivers** and consuming an external **REST API** developed by a third-party team to fetch ticket data dynamically.

I was also responsible for managing the **publishing process** of the application on the **Google Play Store** , ensuring it met all distribution and compliance requirements.

EDUCATION

Diploma, Universidad Tecnológica de Chile, Santiago
2026

Advanced diploma program focused on Artificial Intelligence and Machine Learning, covering modern AI systems, predictive modeling, and real-world implementation of intelligent solutions.

Bachelor's Degree in Computer Engineering, Universidad Tecnológica de Chile, Santiago
2011 — 2015

Graduated as second of the generation

Diploma, Universidad San Sebastián, Santiago

Program to obtain the ability to integrate information technology in the classroom.

Bachelor's Degree in Education, Universidad Tecnológica de Chile, Santiago
March 2004 — December 2007

Graduated as first of the generation

Master GraphQL by creating a CRUD application with React and MongoDB (Udemy), Udemy, Santiago de Cuba
October 2024 — October 2024

Master GraphQL by creating a CRUD application with React and MongoDB (Udemy), october de 2024

TypeScript, Middlewares, Firebase, Immer, Persistence, Slices Pattern, JWTs, Authentication, Interceptors and more, Udemy, Santiago
July 2024 — July 2024

TypeScript, Middlewares, Firebase, Immer, Persistence, Slices Pattern, JWTs, Authentication, Interceptors and more (Udemy), julio de 2024

SSR, SSG, CSR, ISR, Middlewares, Dynamic Routing, Next API, Next Auth, Material UI, Deployments, Cookies and more, Udemy, Santiago
July 2024 — July 2024

SSR, SSG, CSR, ISR, Middlewares, Dynamic Routing, Next API, Next Auth, Material UI, Deployments, Cookies and more. (Udemy), julio de 2024

Build incredibly scalable apps with a microfrontend architecture, Udemy, Santiago
July 2024 — July 2024

Build incredibly scalable apps with a microfrontend architecture (Udemy), julio de 2024

NATS, Webhooks, CI/CD, Git submodules, Gateways, Docker, Kubernetes, GCloud, PosstgreSQL, Mongo, SQLite, Udemy, Santiago
June 2024 — June 2024

NATS, Webhooks, CI/CD, Git submodules, Gateways, Docker, Kubernetes, GCloud, PostgreSQL, Mongo, SQLite (Udemy), junio de 2024

Learn how Observables work and behave in an easy to understand step-by-step way, Udeny, Santiago
May 2024 — May 2024

Learn how Observables work and behave in an easy to understand step-by-step way! (Udemy), mayo de 2024

Getting Started With Docker: Key Concepts for Beginners, Udemy, Santiago
May 2021 — May 2021

Getting Started With Docker: Key Concepts for Beginners (Udemy), mayo de 2021

Design Patterns in Javascript and Node.JS, Udemy, Santiago
April 2021 — April 2021

Design Patterns in Javascript and Node.JS (Udemy), abril de 2021

Learn the basics of Angular 8 from scratch and step by step with Victor Robles. Installation, components and more (Udemy), mayo de 2020, Udemy, Santiago
May 2020 — May 2020

Learn the basics of Angular 8 from scratch and step by step with Victor Robles. Installation, components and more (Udemy), mayo de 2020

Learn to write unit tests with Mocha Chai and Sinon as well as learning how to TDD the right way (Udemy), mayo de 2020, Udemy, Santiago
May 2020 — May 2020

Learn to write unit tests with Mocha Chai and Sinon as well as learning how to TDD the right way (Udemy), mayo de 2020

Become a Docker DevOps Master by learning from scratch the technology that is changing the world with containers!, Udemy, Santiago
May 2020 — May 2020

Become a Docker DevOps Master by learning from scratch the technology that is changing the world with containers! (Udemy), mayo de 2020

Learn how to use Docker by setting up a real development environment. Any language, framework and technology will do!, Udemy, Santiago
March 2020 — March 2020

Learn how to use Docker by setting up a real development environment. Any language, framework and technology will do! (Udemy), marzo de 2020

React native, react hooks, react-navigation versión 4, autenticación, serverless, redux y mejora tu calidad de vida, Udemy, Santiago
September 2019 — September 2019

React native, react hooks, react-navigation versión 4, autenticación, serverless, redux y mejora tu calidad de vida (Udemy), septiembre de 2019

A quick start to building your REST API with Spring Boot and Spring MVC, Udemy, Santiago
May 2019 — May 2019

A quick start to building your REST API with Spring Boot and Spring MVC (Udemy), mayo de 2019

Nativescript + Angular, Udemy, Santiago
May 2019 — May 2019

Nativescript + Angular (Udemy), mayo de 2019

Use JavaScript + NativeScript to build truly native iOS and Android apps by learning NativeScript from scratch (Udemy), mayo de 2019, Udemy, Santiago
May 2019 — May 2019

Use JavaScript + NativeScript to build truly native iOS and Android apps by learning NativeScript from scratch (Udemy), mayo de 2019

An introduction and overview of MongoDB as a NoSQL database solution, Udemy, Santiago
March 2019 — March 2019

An introduction and overview of MongoDB as a NoSQL database solution. (Udemy), marzo de 2019

Everything you need to know about angular using TypeScript and best practices offered by the angular team. (Udemy), septiembre de 2017, Udemy, Santiago
September 2017 — September 2017

Everything you need to know about angular using TypeScript and best practices offered by the angular team. (Udemy), septiembre de 2017

Angular 4: Become a Full Stack Web Developer, Udemy, Santiago
September 2017 — September 2017

Angular 4: Become a Full Stack Web Developer (Udemy), septiembre de 2017

Go - The Complete Guide, Udemy, Santiago

March 2025 — March 2025

Learn Go ("Golang") from the ground up & in great depth by building multiple demo projects, incl. a REST API

Course: Flutter – Mobile Development: From Zero to Expert, Udemy, Santiago
March 2025 — March 2025

Riverpod, BLoC, push y local notifications, DDD, cámara, videos, JWT, go_router, material 3, App Stores y más

Serverless in Spanish with AWS and Serverless, Udemy, Santiago
March 2025 — March 2025

Course: Serverless Application Development on AWS

Next.js - Build Full Stack Apps with Next.js & TypeScript, Udemy, Santiago
2025

Course: A practical and efficient course designed for React developers to master **Next.js 13**, covering routing, data fetching, server/client components, and API routes.

Next.js - The React Framework for production, Udemy, Santiago
2025

Course: A complete course for React developers to master **Next.js 13+ and 14+**, focusing on production-ready features like hybrid rendering, TypeScript support, smart bundling, and route preloading.

Spring Framework 6 & String boot 3, Udemy, Santiago
2025

Course: Comprehensive Spring Framework 6 & Spring Boot 3 course with 81+ hours of content, covering real-world app development, Spring Security, JWT, REST APIs, and full-stack integration with Angular/React — ideal for Java developers.
